General Description:

Design type mobile, 1 panel dim. 72.000 in. Lg 40.000 in. W 60.000 in. H, operating power requirements ac 120-208 volts 60.0 cycles 3 phase dc 28 volts, the trainer will be capable of independent operation and will respond to simulated inputs, visual responses will depict actual system operation, the instrument panel will include operational air speed mach indicator and altimeter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
