Ac Voltage Rating:

115.0 volts

Frequency Rating:

60.0 hertz

Accessory Component Quantity:

1 and 1

Furnished Items:

Table, control unit

System For Which Designed:

Electronic

Accessory Controlling Agency:

Navy special devices center

Accessory Identifying Number:

15-k-5-a model no. Or 15-k-5-b model no.

Output Signal:

Synthetic electrical

Operating Control Method:

Instructor

Phase:

Single

Special Features:

One to sixteen tables can be driven synchronously by one control unit, course can be set in any direction

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T222-a
