End Application:

F-111a

Frequency In Hertz:

60.0

Installation Design:

Mobile

Ac Operating Voltage Rating In Volts:

Between 110.0 and 220.0

Power Source:

Ac

Alternating Current Usage:

Required

Training Phase:

Maintenance techniques

Product Name:

Trainer, electrical system, aircraft; dd61 source request number, usaf-65-35

Phase:

Three

Special Features:

Major components, training panel containing the primary ac power system, 28v dc power conversion system, emergency electrical ac power system, the electrical start and ignition system, the fire detection and warning system and their applicable aircraft controls; o/a dim, 174 in l; 40 in w; 58 in h; the trainer will contain a complete operational aircraft electrical system and be controlled from the actual electrical control panel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T356-a
