Frequency In Hertz:

60.0

Installation Design:

Fixed

Ac Operating Voltage Rating In Volts:

480.0

Power Source:

Ac

Training Phase:

Simulated electrical loads

Product Name:

Mfg name: trainer, electrical power-air conditioning system, launch facility

Phase:

Three

Special Features:

Features include 75 kw diesel generator with controls and power distribution switch gear equipment supplying environmental control system and weapon system simulated electrical loads; installed in operational configuration identical to weapon system equipment with fault insertion capability for maintenance training; training features include instructor console for control of operating mode and fault insertion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T356-a
