End Application:

A/f37a-t50 and a/f37a-t51 cpt

Frequency In Hertz:

60.0

Representation Type:

Simulation

Product Name:

Trainer group, visual flight simulator

Special Features:

Physical characteristics: image generation systems (two for each of four cockpits in a simulator complex), interface/controller system, control system software (operational/maintenance); performance characteristics: provides a perspective correct, calligraphically generated image to crew members, and employs an infinity-type display, to present nighttime-only presentations of take-offs airfield maneuvers, approaches and landings; includes digital imaging equipment for transforming stored data base information into displayed presentations, crew station display units-beam penetration color tubes/infinity image optics, control equipment and computer/interface provisions with the host system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T356-a
