Frequency In Hertz:

60.0

Installation Design:

Portable

Ac Operating Voltage Rating In Volts:

115.0

Power Source:

Ac

Alternating Current Usage:

Required

Training Phase:

Distribution of hydraulic fluid

Phase:

Single

Special Features:

Amperes-16amps; dim, 96in l, 30in w, 60in h; 820 lbs; primary function of trainer is to demonstrate the distribution of hydraulic fluid to and from the following systems: spoilers, flaps, brakes, landing gear, rudder power and copilot's instruments power; demonstrates aerial refueling pumps adn boom hydraulic systems and body fuel pumps; kc-135

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T356-a
