End Application:

Upt-ifs, t-37 and t-38 aircraft

Frequency In Hertz:

60.0

Representation Type:

Simulation

Product Name:

Trainer group, visual flight simulator

Special Features:

4images respond to the simulated aircraft motions corresponding to the pilots control actions; power, 28 kva at 95 per cent power factor; current and fusing, 40 amps/cabinet, 50 amp circuit breakers on each cabinet; wire size awg 6 five circuits

Functional Description:

Provides out the window day-dusk-night imagery of a given airfield and its surrounding environment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T356-a
