Frequency In Hertz:

Between 47.0 and 63.0

Installation Design:

Fixed

Ac Operating Voltage Rating In Volts:

Between 120.0 and 208.0

Power Source:

Ac

Training Phase:

Instructional

Representation Type:

Simulation

Product Name:

Trainer, visual system aircraft

Phase:

Three

Special Features:

The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use

Functional Description:

Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery and low-level navigation scenarios

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T356-a
