Visual Flight Simulator Trainer System - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/6930-01-366-6980

low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Frequency In Hertz:
Fixed Ac Operating Voltage Rating In Volts: Between 120.0 and 208.0 Power Source: Ac Training Phase: Instructional Representation Type: Simulation Product Name: Trainer, visual system aircraft Phase: Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-f63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installation type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Between 47.0 and 63.0
Ac Operating Voltage Rating In Volts: Between 120.0 and 208.0 Power Source: Ac Training Phase: Instructional Representation Type: Simulation Product Name: Trainer, visual system aircraft Phase: Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-f63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	nstallation Design:
Between 120.0 and 208.0 Power Source: Ac Training Phase: Instructional Representation Type: Simulation Product Name: Trainer, visual system aircraft Phase: Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-f63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installation type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Fixed
Power Source: Ac Training Phase: Instructional Representation Type: Simulation Product Name: Trainer, visual system aircraft Phase: Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installation type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Ac Operating Voltage Rating In Volts:
Training Phase: Instructional Representation Type: Simulation Product Name: Trainer, visual system aircraft Phase: Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Between 120.0 and 208.0
Training Phase: Instructional Representation Type: Simulation Product Name: Trainer, visual system aircraft Phase: Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-f63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Power Source:
Instructional Representation Type: Simulation Product Name: Trainer, visual system aircraft Phase: Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Ac
Representation Type: Simulation Product Name: Trainer, visual system aircraft Phase: Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Fraining Phase:
Simulation Product Name: Trainer, visual system aircraft Phase: Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	nstructional
Product Name: Trainer, visual system aircraft Phase: Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Representation Type:
Trainer, visual system aircraft Phase: Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Simulation
Phase: Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Product Name:
Three Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Frainer, visual system aircraft
Special Features: The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Phase:
The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Three
generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type, ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Special Features:
ground use Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	The trainer is used exclusively with an f-16 operational flight trainer type number a/f37a-t63; power char. 13.88; c/o 3 channel image
Functional Description: Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	generator, display power supply cabinet, instructor operator station w/repeater; wide-angle-collimated optic display; installaion type,
Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery a low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	ground use
low-level navigation scenarios Shelf Life: N/a Unit Of Measure: Demilitarization:	Functional Description:
Shelf Life: N/a Unit Of Measure: Demilitarization:	Provides training to f-16 pilots in tasks which don't require the full visual scenes for take-off/landing, a/a intercept, a/g weapons delivery and
