Design Type:

Mobile

Simulated Aircraft Model Number:

Kc-10

Special Features:

Item is used to aid in transitioning aircrews into a designated aircraft. It provides cockpit familiarization, crew coordination and systems training in normal, abnormal, and emergency procedures. Applicable systems operation, aircraft instruments and other indicators respond appropriately to trainee control inputs. This trainer is not equipped with a hydraulic motion base, nor does it have an out the window visual system display. All aircraft systems may not be fully functional

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T262-g
