Features Provided:

Electrostatic sensitive

Product Name:

P5 combat training system (cts)/tactical combat training system (tcts)

Special Features:

System contains two subsystems: participant subsystem (ps) and ground subsystem (gs); ps is the airborne component, which provides real time kill notification; gs offers postmission debriefing capability

Functional Description:

Provides capability to train at a wide range of altitudes over land or sea using a gps based tracking system; weapon simulations used during training can be customized to fit specific parameters

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
