Overall Length:

180.500 feet

Overall Height:

12.000 feet

Overall Width:

20.900 feet

End Application:

Training aids and devices

Design Type:

Stationary

Training Phase:

All phases of the mc-130h mission to include procedural

Simulated Aircraft Model Number:

Mc130h

Special Features:

The weapon system trainer features a dimensionally correct cockpit on a motion base with a full complement of functional panels; switches; controls; and displays, high fidelity visual system provides an out the window capability to support training for formation flying; takeoff and landing; emergency procedures, and limited within visual range combat

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T262-g
