End Application:

Epx-500

Product Name:

Interface control assembly, simulator, signal data

Special Features:

Can be configured up to 64 graphics cards in 4 card increments; epx-500 incorporates the full range of epx techno; ogy features, including shader-based pixel-rate-lights, weather effects, envionmental effects, sensors, and mission functions

Supplementary Features:

4 pcie cots graphics cards,   card performance parameters; 8g pixel/second; 810m polygon/second; 512m bytes memory; 2 dual-link dvi-i video outputs; 2 dual-link dvi-i video inputs (for image combining); resolutions up to 4m pixes per video output are supported; multiple outputs can be synchronized to produce higher nadwidth images

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T222-a
