End Application:

Epx-5000

Product Name:

Interface control assembly, simulator, signal data

Special Features:

Outstanding image quality, with area-based, sub-pixel, full-screen antialiasing, providing improved cues and object recognition; 2gbytes dedicated texture memory for very high resolution, imagery-based databases; full-speed super texture for improved speed and height cues for low level operations; 20-bit monochrome resolution for high fidelity sensor simulation

Supplementary Features:

High fidelity weather and atmospherics, including multiple textured layered clouds and fog; multiple phong light sources for light lobes, flares, specular highlights and spotlights; embeded hardware support nlim; hardware support for coplanarity to eliminate flimmering

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T222-a
