End Application:

Device no. 15-j-1-c

System For Which Designed:

Mechanical

Output Signal:

Provides rate of turn to an assigned target

Operating Control Method:

Instructor

Usage Design:

Provides a present rate of turn of the course generator azimuth dial to change the reading of a target from zero to 40 degrees per second

Special Features:

Provides a present rate of turn of the course generator azimuth dial to change the reading of a target from zero to 40 degrees per second

Specification Or Standard:

File no. 15-j-4-s

Reference Number Differentiating Characteristics:

As differetiated by the material requirement

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T222-a
