Current Rating:

17.000 amperes

Voltage In Volts And Current Type:

120.0 ac

Product Name:

Computer system, digital

Special Features:

C/o 2 keyboards, 2 trackballs, 2 cpus, 1 5.25 floppy drive, 1 cd rom drive, 2 external hard drives, 1 tape drive, 2 cathode ray tubes; item design is desk top

Functional Description:

System is intended for use of ground theater air control squadrons, system provides proficiency training for mce operators; system consists of networked "psuedo-pilot" workstations interfaced to an operations module via a gateway; system provides access to the mce interal simulator subprogram

General Description:

A modular, transportable, field operable system which interfaces with an/tyq-23 module control equipment (mce), also provides training simulation for mce console operators; system is housed in 6 to 17 reusable transit cases

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
