End Application:

Enhanced model 527 radar simulator (with mmw1 band coverage)

Special Features:

Model 527 enhanced with mmw option: with batteries. Model 527 is designed to provide organizational-level flight line capability for verifying operational status of aircraft-installed electronic combat systems including their associated installed antennas, transmission lines, radomes, cockpit displays and controls. Model 527 may be used for end-of-runway and walk-around radiated radar warning receiver (rwr) testing.
