Product Name:

Spectrum monitoring and engineering subsystem

Special Features:

Smecs provides the means to monitor, measure, and record all relevant ntc electromagnetic emissions that may interfere with the ntc or regional area surrounding fort irwin, ca. It has the capability to track signal sources via fixed site and mobile direction finding. The smecs is comprised of two components, a real time monitoring frequency (rtmf) component and a direction finding (df) component.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
