Overall Length:
4.350 inches
Overall Height:
1.375 inches
Overall Width:
1.784 inches
End Application:
Consol gse
Product Name:
Inavy: signal conditioner vibration
Special Features:
Voltage range is 20-32 vdc unregulated
General Description:
Band pass filter: the 1-808 transmitter contains a band pass filter, which consists of a low-pass and a high-pass, 8-pole, inverse tsc filter;
filter roll off is better than 42 db/octave; the cutoff frequencies are specified at time of order; operation: accepts either a millivolt or charge
input, filters the signal, and normalizes the output to the specified full-scale output; performs a true rms conversion and transmits this data
in a 4-20 ma, 0-5 vdc or 0-10 vdc format
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
Yes - demil/mli
