Overall Length:

4.350 inches

Overall Height:

1.375 inches

Overall Width:

1.784 inches

End Application:

Consol gse

Product Name:

Inavy: signal conditioner vibration

Special Features:

Voltage range is 20-32 vdc unregulated

General Description:

Band pass filter: the 1-808 transmitter contains a band pass filter, which consists of a low-pass and a high-pass, 8-pole, inverse tsc filter; filter roll off is better than 42 db/octave; the cutoff frequencies are specified at time of order; operation: accepts either a millivolt or charge input, filters the signal, and normalizes the output to the specified full-scale output; performs a true rms conversion and transmits this data in a 4-20 ma, 0-5 vdc or 0-10 vdc format

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
