End Application:

Asas ace

Special Features:

The an/tyq-90a is capable of information processing, networking, and communications that interoperates with other ace variants and asas light. It also supports battle command and information operations through rapid correlation and fusion of combat information from all available sources including the distributed common ground station-army (dcgs-a). The an/tyq-90a provides timely targeting information and a variety of intelligence products/reports for battlespace planning and battlefield execution. The an/tyq-90a is a technical upgrade and footprint reduction of pm chs and cots communication equipment. It provides for additional functionality via integrated communication modules and dcgs-a software enhancements. The hardware equipment listed in block 14-7 complement data reflects sof quantities.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
