Overall Length:

1.120 inches

Overall Height:

6.525 inches

Overall Width:

9.600 inches

Special Features:

Major components: arithmetic logic unit (alu) subsystem 1; central processing unit (cpu); resident memory subsystem; chassis mounted; cpu features a 16 bit single word & 32 bit double word instructions; alu includes optional multiply accelerator, single & double precision floating point logic & floating point scratch ram; memory subsystem contains 64 kilobytes ram

Unpackaged Unit Weight:

4.490 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
