**Overall Length:**

8.300 inches

**Overall Height:**

1.530 inches

**Overall Width:**

5.700 inches

**End Application:**

Mission development element system for the milstar program

**Unit Design:**

Desk top

**Product Name:**

Standalone infoserver 1000,  thinwire

**Interface Type:**

Scsi

**Memory Size:**

4.0 megabytes

**Special Features:**

2.75 lb wt;  120-240 vac power voltage;  32-bit cpu with 1 kb first-level cache;  512 kb flash rom memory;  interfaces include scsi port 1, asynchronous 9600 baud terminal port 1,  thinwire ethernet port 1;  supports the vt300 and vt400 series terminals;  works in conjunction with scsi storage devices such as cd-rom,  hard drives,  magneto-optical,  tape drives and cd-recordable drives to provide information to lan users;  p50.0 degrees to p104.0 degrees f operating temperature

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**
