Overall Length:

3.900 inches

Overall Width:

1.800 inches

Product Name:

lp-unidig-o

Special Features:

lp-unifig-d is constructed out of 0.062 inch thick fr4 v0 material, 6 copper layers consist of 2 signal layers on the top and bottom, and internal layers, 2 internal layers are dedicated to power and ground planes and 2 are used for signal wiring; power requirements p5.0 vdc, 510 ma typical; temp coefficient 0.89 w/deg c uniform heat across ip; transfer rate 8 mbytes/second max, continuous; wait states zero; isolation voltage 100 volts min; output update rate 1 mbit/second max

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
