Overall Length:

14.260 inches

Overall Height:

7.640 inches

Overall Width:

2.430 inches

Product Name:

Enhanced ground proximity warning computer (egpwc) mk vii

Special Features:

Uses aircraft inputs such as position, attitude, air speed, and glideslope, which along with internal terrain, obstacles and airport databases predict conflict between the aircraft's flight path and terrain or an obstacle; when upgraded with (raas) runway awareness and advisory system software, the computer provides improved situational awareness to help lower probability of runway incursions by providing timely aural advisories to the flight crew during taxi, takeoff, final approach, landing and rollout; provides both audio and visual alert messages as well as terrain display data; a 115vac/400 hz supply is required

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A519j0
