Overall Length:

8.7 inches

Overall Height:

3.9 inches

Overall Width:

0.8 inches

End Application:

An/fpq-16 acquisition radar attack characterization system

Mounting Configuration:

Rack

Product Name:

Fault monitor cpu module

Special Features:

Mounted in frequency distribution assembly r102822-01; used to monitor faults from 19 slots, three reference inputs, and three external fault inputs

Reference Data And Literature:

Pto31p2-2fsq100-2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
