Alternating Current Voltage Rating In Volts:

115.0

Power Source:

External

Phase:

Single

Special Features:

Consists of a variable number of matched input couplers and amplifiers, 1 recorder-reproducer, 1 oscilloscope, 1 time code generator, 1 time code tape controls unit, 1 monitor switching panel, 1 master control panel, 1 event marker, 1 calibrator, 1 voice monitor, 1 power supply, 1 blower, 1 signal connector panel

Frequency In Hertz:

60.0

Functional Description:

Collects, records and displays analog signals

Supplementary Features:

Data acquisition system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A30800
