General Description:

Type mos %metal oxide conductor*, capaci type 4k words per memory storage card, word length 16 bits, speed %cycle* 1.0 microsecond, addressing random access, operating modes read and write, internal voltages p3.5 %vbb*, p5.0 %vcc*, p16.7 %vss*, power requirements 115.0 vac, 60.0 hz, single phase, three fans mtd within encloser, operating ambient temp 15.5 degrees to 32.2 degrees c, humidi type 20 to 90 percent, operating altitude 10000 ft, dim. 7.000 in. H, 19.000 in. W, 22.000in. Depth, a power on/off switch and voltage pilot indicators are mtd on brushed aluminum front panel, memory and power supply are housed in single rack-mountable enclosure

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
