Design Type:

Flexible disk

Special Features:

Built-in controller, up to three slaves can connect to one master, average transfer rate between computer and disk drive is 32kb, double-density read/write on flexible disk further enhances access rate and increases total storage capability, average access time to any location on the disk is 267ms, has random access, disk directory, efficient packing of data on disk, write verify feature

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505e0
