General Description:

Four signals affected are receive data, transmit data, receive signal element timing and transmit signal element timing; 62 kilohm impedance input, 50 ohm impedance output, max input porm 30 volts; power 115 vac, 50/60 hz, 3 watt; 3 watt; 3.625in h x 8.500in w x 6.375in d; 0 to 70 degrees c operating temp range 10000 ft maximum altitude

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
