Overall Height:

Between 11.000 inches and 14.500 inches

Overall Width:

13.400 inches

Operating Temperature Range:

+15.0/+30.0 degrees celsius

End Application:

Tars

Paper Feed Mechanism:

Automatic sheet feeder

Printer Type:

Laser

Unit Design:

Free standing

Interface Type:

Scsi

Special Features:

Frequency range 47 - 63hz; heat dissipation - 1700btu/hou (460watts); primary fusing - 115vac, 8amps and 220vac, 5amps(not user accessible) ; primary voltage ranges - 87-128vac, 115vac & 174-264vac, 220vac ; humidity -operating 10%-80% relative humidity, noncondensing; depth w/out lower tray assembly=17.5", with lower tray assembly = 18.8"; requested name- printer, automatic

Type/model Designation:

Phaser 450

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
