Mounting Type:

Bracket

Alternating Current Voltage Rating In Volts:

100.0 and 240.0

Storage Temperature Range:

-40.0/+70.0 degrees celsius

Unpackaged Unit Width:

5.70 inches

Unpackaged Unit Height:

1.00 inches

Power Source:

External

Phase:

Single

Frequency In Hertz:

50.0

Functional Description:

The extron rgb is a 350mh universal analog computer-video interface designed to connect pcs and workstations to large screen display systems. It features a buffered computer video output which enables the computers local monitor to be used while the rgb/bnc output is displayed on a large screen monitor or projector. Vga connectors are used for computer input and local monitor output and adapter cables are provided for mac and sun/sgi/13w3 type computers. The rgb-190 may be used as a freestanding or with optional brackets which enable it to be mounted under, on the side or in a cutout of almost any desk, table, podium or wall.
