Operating Temperature Range:

+0.0/+40.0 degrees celsius

Maximum Voltage Rating In Volts:

5.0 dc

Inclosure Type:

Encased

Power Source:

External

Special Features:

2048 bits charge coupled device; 0.125 mm resolution; 80.0 mm scanning width; 45 pct or more pcs value; visible led (wavelength 660nm) light source; 20mm maximum reading distance; rj-45 modular connector; 5vdc supply voltage; 160ma power consumption typical in operation; 0-40 degrees c operating temp; 1500lux maximum (fluorescent) 800 lux maximum (sunlight) ambient light rejection; 2m straight cable; abs plastic case; interfaces: keyboard emulation, rs-232c serial, c-mos serial and wand emulation; readable codes: 39, ful ascii code 39, 2 of 5, upc/ean/jan, code-128, code-93, and codebar; built-in decoder, symbologies selection, check digit selection, prefix/suffix, good read beep tone, enable/disable trigger

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A31700
