Unpackaged Unit Height:

1.650 inches

Furnished Items And Quantity:

9vdc; 1.0a power supply 1, inline adjustment tool with technician's blade

Current Rating In Amps:

1.0

Power Source:

External

Special Features:

The cia100 is a high performance computer interface for video signals. The unit is compatible with a wide variety of analog video signals including vga, vga, xga, sxga, xga, mac, sun and other high resolution workstations, standard vga connectors - featuring 15-pin hd female connectors for input and local monitor output, the cia100 connects directly to pc, mac and sgi graphics ports and local monitors that have 15-pin hd connectors using standard vga cables (no proprietary input cables required), ultra high resolution amplification - the cia100 offers 400 mhz video bandwidth, selectable output sync format - the unit can be set for rgbhv, rgbs or rgsb output sync as required by the data display device and signal distribution system. The cia100 does not strip sync off of the green signal (i.e. Rgsb input signals appear at the output as rgsb)
