Mounting Type:

Base

Alternating Current Voltage Rating In Volts:

120.0

End Application:

An/fsq-206

Unpackaged Unit Length:

13.60 inches

Unpackaged Unit Width:

17.10 inches

Unpackaged Unit Height:

5.50 inches

Current Rating In Amps:

3.2

Power Source:

External

Phase:

Single

Special Features:

The 12-port base unit is the basic building block of the servswitch multi system. Use it to build a multiuser, multiplatform system matched precisely to your application. Add up to 12 user or cpu interface cards to the base unit to start. And when it's time for your system to grow, add to it by connecting one or more exp chassis. The 12-port base unit actually supports up to 14 modules. One slot has a local console module preinstalled to connect your primary keyboard, monitor, mouse, and other peripherals to the front of the switch. The local console module has connections for sun, mac, and ps/2 style keyboards and mice plus connections for a vga style monitor, a serial mouse, speakers, and a microphone. Another slot is reserved for an expansion card. The 12-port base unit features 12 push buttons with leds and an alphanumeric display.

Frequency In Hertz:

50.0 and 60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A30800
