Overall Length:

7.380 inches

Overall Height:

1.680 inches

Overall Width:

4.670 inches

End Application:

Mo-11/tps-76

Features Provided:

Locking device

Component Type And Quantity:

1 chassis

Special Features:

Requirements: the hdd storage module shall be capable of sliding into the designated removable storage module frames mounted in the 5.25-inch drive bay of item 55910-0204592 computer, radar. The device shall provide a means to set the hdd's scsi id number without the necessity of removing the hard drive from the device. The device shall provide the proper power to the hdd. The device will use a small computer system interface (scsi) - 2 ultra (low voltage differential (lvd)) interface as the method to transfer data between the hdd and the computer, removable handle, data interface and power: the data interface shall be a 68-pin scsi-2 ultra (lvd), the device shall accept standard, internal, four-pin atx-power connector.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
