Direct Current Voltage Rating In Volts:

12.0

Storage Temperature Range:

-20.0/+70.0 degrees celsius

End Application:

7266 fy03

Unpackaged Unit Height:

4.20 inches

Power Source:

External

Special Features:

Provides 2 field selectable rs-232/422/485 serial ports for control and automation application, card is modified for an oscillator change which allows the card to transmit and receive data in the same way

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A30800
