Mounting Type:

Rack

Alternating Current Voltage Rating In Volts:

240.0

Storage Temperature Range:

-40.0/+185.0 degrees fahrenheit

Unpackaged Unit Width:

17.00 inches

Unpackaged Unit Height:

1.75 inches

Power Source:

External

Input Intelligence Type:

Analog

Output Intelligence Type:

Analog

Special Features:

Controls up to 128 computers from one console, serial port rs-232, automatic system restart, flash memory for upgrade, plug and play compliant

Frequency In Hertz:

50.0 and 60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A30800
