Overall Length:

19.500 inches

Overall Height:

12.220 inches

Overall Width:

17.060 inches

Storage Tempurature Range:

-25.0/+150.0 degrees fahrenheit

Wattage Rating:

400.000 watts

Voltage In Volts And Current Type:

28.0 dc

Special Features:

Operating temp 0 -120 degrees f; shock 0 to 70 degrees f and 120-70 degrees f in 10 min; humidi type 10 - 95 pct non condensing; altitude 15000 ft operating; 40000 ft non operating; vibration transport in wheeled and tracked vehicles; shock/drop bench handling 3 drops on each face from 3 feet in transit case; rain operates in conditions of blown precipitation and spillage; sand and dust 3.5 mph for 20 minutes; tilt operates stationary 30 degrees incline on any axis; fungus no nutrients/contaminants; emi military standard 461d, notice 2; hemp military standard 2169b; electrical 110-220 porm 10 pct at 50/60 porm 10 pct hz, optional 28 vdc

Functional Description:

Scalable and expandable design of this platform enables it to perform as either a client or server in a networked environment; front access media design offers four user-selectable, industry standard, half-height drive bays, a standard floppy drive and an optional pcmcia reader; provides two upa graphics slots that support sun's premier elite3d m3/m6 technology; light weight, 19 inch rack-mountable, 7u chassis that allows up to 6 complete systems to be mounted in a single 42u rack assembly

Shelf Life:

N/a
