Product Name:

Silkworm 3800 enterprise fabric switch

Special Features:

Brocade fabric shortest path first, fspf, enables the fabric to automatically isolate problems and reroute traffic around failed links onto alternate paths-ensuring availability for mission-critical enterprise applications

Functional Description:

Auto-sensing fibre channel switches increases performance and functionality for storage area networks; combines 1 and 2 gbit/sec fibre channel to enable 32 gbit/sec uncongested switch throughput; improve san security, availability, performance and centralized data management

managomoni
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No

Fiig:

A30800
