Ac Voltage Rating:

80.0 volts and 132.0 volts

Frequency Rating:

Between 47.0 hertz and 63.0 hertz

Switch:

Included

End Application:

Oxygen concentration system

Electrical Power Source Relationship:

Alternate operating

Sectionalized Feature:

Not included

Illuminated Feature:

Not included

Internally Illuminated Feature:

Not provided

Product Name:

Simulator/ac input module

Phase:

Single

Special Features:

Eight inputs per module; one commons per module (2 i/o terminal points; 132vac peak voltage; removable terminal type; 2.5 ounces

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T122-c
