**Storage Tempurature Range:**

-20.0/+60.0 degrees celsius

**Current Rating:**

50.000 milliamperes

**Voltage In Volts And Current Type:**

9.0 dc

**Product Name:**

Parallel memory reader/writer

**Special Features:**

4lightweight;  supports interchangeable use of parallel reprogrammable keys;  mechanical contact life,  socket,  200, 000 insertion/removal cycles min;  electrical power requirements external power supply 9 volt dc at 50 ma;  i/o connector 9-pin male to 9-pin female;  operating temp 0.0 to 50.0 degrees c;  relative humidi type 5 pct to 95 pct non-condensing;  supplied accessories rubber feet hook and loop mounting pads;  manual 6 ft 6 inch 9-pin male to 9-pin female cable;  mating components pk64kc and pk256kb keys

**Functional Description:**

A self contained read/write interface unit that connects to host hardware via a standard rs-232 port

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
