End Application:

Processor unit

Unit Design:

Panel mounted

Voltage In Volts And Current Type:

5.0 dc

Product Name:

Display unit

Interface Type:

Rs 232c

Special Features:

Gu140x16g-7000 dot graphic vfd module; high brightness blue green display; operating temperature is negative 40 degrees c to 80 degrees c; 11 multisized fonts; high speed 8 bit parrallel interface; asynchronous rs232 serial interface.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A506z0
