End Application:

Workstation

Usage Design:

The hard drive storage kit is a steel-constructed drive carrier and receiving frame for internally mounting a low-profile (up to 1 inch high), 3.5 inch form factor drive into any standard or undersized half-height, 5.25 inch peripheral bay; the storage kit is available in models which support scsi ultra160 interface and is downward-compatible with drives from earlier technologies

Product Name:

Carrier & receiver

Special Features:
