Overall Length:

2.160 inches

Overall Height:

5.160 inches

Overall Width:

7.600 inches

End Application:

Spacelift range systems (slrs)

Display Type:

Liquid crystal

Unit Design:

Portable and tilt/swivel base and rack mounted

Product Name:

Monitor 7 inch with v mount battery adapter

Diagonal Display Size In Inches:

7.0

Special Features:

Completely digital tft-megaixel high resolution lcd screen with 1.2 million pixels, 4 pin xlr power jack, optical grade screen protection; runs 4 to 6 hrs on 50 wh battery; wide viewing radius 130 degrees horizontal and 120 degrees vertical; analog signals digitized using advanced 10 bit process with 4x over sampling and adaptive 4 line comb filter plus exacting color space conversion; high resolution screen 800 x 480 dots; std inputs: composite video pal/ntsc with loop output, 4 pin xlr d.C. Power jack; includes 1/4 - 20 mounting plate that can be attached to any edge of the enclosure; includes universal voltage class 2 power supply.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
