Unit Design:

Rack mounted

Interface Type:

Rj45

Special Features:

-4-port gigabit ethernet test module; combines network emulation and traffic generation with line rate avalanche application traffic for layer 2-7 testing; supports line rate layer 2-3 test traffic and layer 4-7 traffic over 10/100/1000 mbps copper or gigabit ethernet sfp interfaces

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A502f0
