Current Rating:

1.480 amperes

Wattage Rating:

7.400 watts

Voltage In Volts And Current Type:

5.0 dc

Special Features:

2 ethernet ports 10/100 mbytes (one ip address) with built-in, auto sensing ethernet switch, 1 station manager port this feature can be used for testing and troubleshooting ethernet communications, 1 ethernet restart pushbutton

General Description:

Operates as an ethernet global data (egd) station, exchanging i/o data, status, and control data on an ethernet network

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23900
