End Application:

Common air route surveillance radar antenna distribution system (carsrads)

Product Name:

Ethernet adapter

Special Features:

The el6601 ethernet switch port terminals are used for the decentralized connection of ethernet devices to the ethercat terminal network. Bus system all ethernet (IEEE 802.3)-based protocols, store and forward switching mode, ethernet interface 10base-t/100base-tx ethernet with 1 x RJ 45, data transfer rates 10/100 Mbit/s, power supply via the e-bus

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A502f0
