| Overall Length:                                                            |
|----------------------------------------------------------------------------|
| 2.500 inches                                                               |
| Overall Height:                                                            |
| 0.687 inches                                                               |
| Overall Width:                                                             |
| 2.000 inches                                                               |
| Component Type And Quantity:                                               |
| 2 transistor and 3 capacitor                                               |
| Special Features:                                                          |
| Semiconductor device 1; terminal board 1; unthded holes irregularly spaced |
| Shelf Life:                                                                |
| N/a                                                                        |
| Unit Of Measure:                                                           |
|                                                                            |
| Demilitarization:                                                          |
| Yes - demil/mli                                                            |
| Fiig:                                                                      |
| A511I0                                                                     |
