General Description:

Controls data readout from up to 50 printing modules; transfers digital data to one of two comm links, rs-232-c or 20-ma current loop; transfers control information from comm link to scaler loop; lsi circuitry including a microprocessor; p12v-385ma, m12v-80ma; 8.714 in. Lg; 2.700 in. W

Fsc Application Data:

Stellar photometric system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
